

ENVIRONMENTAL POLICY

As Trakya Döküm, we are committed to adopting an environmentally sensitive production approach, minimizing our environmental impact at every stage of our production activities and following the principles of sustainable development. In our activities, we aim to use natural resources efficiently and sustainably, protect biodiversity and maintain environmental sustainability.

As Trakya Döküm, we adopt the following principles in line with our Environmental Policy:

- To comply with all national and international environmental legislation and standards,
- To regularly review and continuously improve the ISO 14001 Environmental Management System,
- To develop efficiency projects that reduce energy, water and raw material consumption to ensure efficient and sustainable use of natural resources,
- To reduce, reuse, recycle and recover waste at source by adopting the waste management hierarchy,
- To integrate innovative technologies and best practices into production processes to minimize environmental impact and improve performance,
- To regularly assess the negative impacts and environmental risks on habitat, ecosystems and biodiversity that may result from activities and adopt appropriate management strategies to minimize these risks,
- To develop preparedness and response procedures for environmental emergencies,
- To inform stakeholders regularly and transparently about environmental performance and responsibilities,
- To organize regular training programs to increase the environmental awareness of employees,
- To cooperate with non-governmental organizations and public institutions to develop environmental protection projects.
